FOR IMMEDIATE RELEASE

Av8 PMA Expands Operations With New Dedicated Engineering Facility

Houston, TX, April 9, 2018- Av8 PMA, a leader in the reverse engineering, certification and manufacturing of PMA aircraft parts, is pleased to announce it will expand their current operation by adding a 3,320 sq. ft. facility in Dallas, TX, dedicated to the company's engineering activities. The new location is scheduled to be operational in April 2018.

The facility will act exclusively as an engineering facility, handling engineering and certification work for PMA. Additionally, the space will have on-site laser scanners, a 3-D printer, and other high-powered equipment that will increase efficiencies related to the reverse engineering process of parts and prototype development. The Dallas location will provide engineering work for clients within all segments of the aviation industry.

"This facility is the culmination of almost a year's work to elevate our in-house engineering and certification capabilities to the next level and better position ourselves for future growth," said Yoel Arnoni, Principal, Av8 PMA.

Conveniently located in Houston, TX, Av8 PMA has extensive experience in the reverse engineering, certification and manufacturing of individual aircraft parts, as well as assemblies. With more than 500 parts certified by the FAA and EASA, Av8 PMA saves time and money for both operators and MROs when it comes to parts availability and replacement costs. To learn more or to inquire about a part contact Av8 PMA today at 713.589.2668 or visit www.av8pma.com.
